Drink plenty of water to maximize results.

Oska Pulse VS TENS Unit

One time purchase	Ongoing costs
Long term relief	Blocks pain only
Easy-to-use	Complicated

HEAR WHAT OSKA PULSE USERS HAVE TO SAY.....

“

It has now been a little over a month, and I'd like to give an update on my Oska Wellness Pulsating Electromagnetic Field (PEMF) generator. But the exciting part is that my OSKA took the inflammation away. It helps to reduce the pain. I'm at the point where I don't even know the thing is on me. There is no discomfort whatsoever from it. - **Jeff S.**

”

“

I purchased the Oska unit after my orthopaedic doctor suggested I give it a try. It arrived last week. I have been using it for about 5 days now on various parts of my body, both joints and muscles. This product is crazy great. You feel nothing and you hear nothing. But the results are amazing. My pain levels have all dropped and things are slowly improving. Great product for athletes and active people. I wish I had known about this unit years ago. - **Tom H.**

”

“

Our 15-year-old daughter was diagnosed with complex regional pain syndrome which is horribly painful. Often times she was unable to walk or even stand. After 3 weeks of faithful use my daughter's pain was gone! Most days she has zero pain. I'm so thankful she got her life back and I tell everyone I know about how great the Oska is! - **Bonnie H.**

THAT IMPROVES & ACCELERATES
THE NATURAL HEALING PROCESS
WHILST ELIMINATING
INFLAMMATION & PAIN**

TAKE CONTROL OF YOUR RECOVERY

WHAT IS OSKA PULSE?

Oska Pulse is a CE certified Class IIa medical wearable device to be used alone or as an adjunctive therapy for improved healing of existing conditions, reduce inflammation and as an additional therapy in treating osteoarticular conditions, ie arthritis. Oska PEMF mimics the natural electrical signals produced by the body to promote recovery. Compact, portable, non-invasive and hands free, Oska Pulse provides drug-free pain relief.

HOW DOES OSKA PULSE WORK?

Oska Pulse uses a series of proprietary Pulsed Electromagnetic Fields (PEMF) engineered to target the source of your pain, without drugs.

PEMF has been considered effective and non-invasive way to relieve pain for nearly 70 years, with over 10,000 clinical studies supporting its effectiveness and widely used by pain clinics and health care professionals in the USA and Europe.

NON-INVASIVE AND EASY TO USE

Oska Pulse does not need to be in direct contact with the skin to be effective, but simply placed near the source of the pain/area requiring recovery. PEMF fields can travel through most clothing and address the source of the issue at cellular level.

Developed in Western Australia and manufactured in the USA, Oska Pulse is designed to be fully integrated into your lifestyle so that you and your family can benefit anytime, anywhere you are, whether at work or play.

PORTABLE

A small, portable hands-free device that can be worn over clothing, providing drug-free relief for knee, back, joint, acute and chronic pain.

PROMOTES RECOVERY

Most pain management solutions simply block the pain.

Oska Pulse is designed for relieving pain and inflammation anywhere in your body and improving healing.

EASY-TO-USE

Oska Pulse starts with a simple push of a button and handy USB cable makes charging easy.

This product may not be right for you. Read the warnings before purchase. Follow the instructions for use, and if symptoms persist talk to your healthcare professional.
